## ABOUT THE BOOK

### How to Clear ANY Worry, Hurt, Anger or Fear

**F**or all who wish to de-stress their lives and enhance their inner joy, harmony and optimism. Innovative and easy-to-learn self-healing methods for all situations – from a renowned scientist and best-selling author.

There is no area in your lives you can completely control – even if you had the means and the power to do it. However, there is one thing you can influence at all times: your frame of mind.

Pete A. Sanders Jr., a biochemist, shows how you can, with revolutionary and simple techniques, enter into a good spirit and thereby attract more success and happiness.

The “joy touch” is a very effective “mood regulator”, a physiological contact with joy that consciously stimulates a feeling of well-being. This method is quickly learned, and once trained can be easily used in any type of situation. You have the power to feel much better within the space of just a few moments – completely without the use of alcohol, nicotine, drugs or over-eating.

In a clear language supplemented with illustrations, the author explains how you can counteract the area in the brain that often unnecessarily worsens your feelings and is responsible for 90 percent of your emotions: the limbic system, or “emotional” part of the brain.

Substantiated by a pilot study from the *University of Arizona*.

### ABOUT THE BOOK

#### Zen at Its Finest – This Classic Work Is a Must for all Zen-Buddhists

**N**ow available in German – for the first time as a complete and unabridged translation of the original Chinese text. A jewel that can be read over and over again – each time revealing new and unexpected pleasures.

The essence, the ultimate truth, is inexpressible – a belief shared by the wise and enlightened of all cultures throughout the ages. Yet even though they cannot directly “communicate” it – the old Zen Masters found a tool to challenge you to distinguish this wisdom for yourselves: the *kôan*. With the words and deeds of the enlightened Masters described in these literary “flashes”, you are sent on a journey of discovery that, when followed single-mindedly, can lead you to a personal awakening. Over a period of around a thousand years, *kôans* have been used as a means of teaching on the way to enlightenment; today, they still have kept their explosive force as slayers of illusion.

Three major collections of these Zen stories are used in systematic *kôan* teaching: the *Wumenguan* (Japanese: *Mumonkan*), the *Biyanlu* (*Hekiganroku*) and the *Congronglu* (*Shôyôroku*).

Dietrich Roloff, one of the most distinguished German Zen authorities translated this unique work from the original Chinese text. In explanatory commentaries, he deciphers hidden Buddhist and Taoist allusions, and provides a commentary for Western readers.

### ABOUT THE AUTHOR

Dietrich Roloff has a degree in classical philosophy. Later, he became involved with ancient Chinese classic texts, including the *Dao-De-Jing*, and the important Kôan collections *Mumonkan/Wu-men-guan*, *Hekiganroku/Bi-yan-lu* and, most recently, the *Shôyôroku/Cong-rong-lu*. He completed his first *sesshin* as taught by the “Rinzai School” and ultimately also turned his attention to the Japanese tea ceremony; today, he can call himself a master of the *Ueda Sôko Ryû, Hiroshima*.
